Innovative

Ever since BagcraftPapercon first introduced our flexible foodservice packaging in 1947, we have been committed to developing innovative solutions that successfully address the ever-evolving needs and expectations of foodservice, supermarket and food processing companies worldwide. Such innovation has generated 17 patents and scores of national and international packaging awards for our company and positioned us as the largest paper-based, flexible foodservice packaging firm in North America. Most importantly, our innovative solutions have helped our clients greatly improve their foodservice operations, product performance and bottom lines.

Practical

BagcraftPapercon places a keen focus on value and function in the design and manufacturing of our products. Flexible foodservice packaging offers a practical blend of affordability and functionality, which makes it an excellent choice to reduce costs while improving bottom line growth. With more consumers and operators demanding practical packaging alternatives to rigid plastic and paperboard, our flexible paper packaging offers the most practical, cost-effective option available because it produces less waste, requires fewer raw materials and reduces manufacturing, transportation and storage costs.

Sustainable

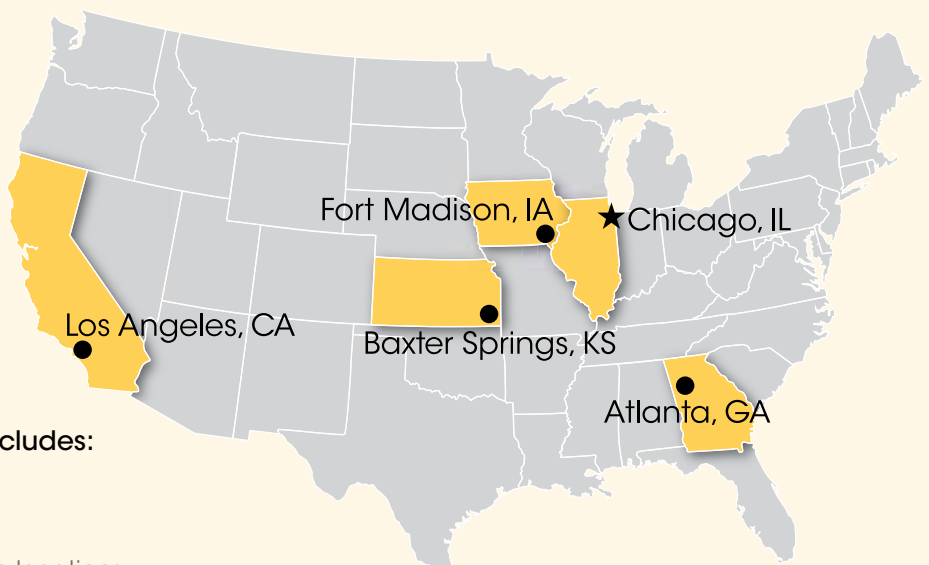

BagcraftPapercon has also been at the forefront in bringing sustainable packaging choices to the industry. With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products through eco-centered technologies, innovations and solutions that meet our sustainability goals and those of our clients. As members of the Sustainable Packaging Coalition, we support a common vision of attaining a true closed-loop system for all packaging that promotes positive economic and environmental outcomes. Part of this vision is ensuring that our sustainable packaging is affordable today in order to make a more significant and lasting impact on the environment for the future.

We make it easy for you to consolidate your flexible foodservice packaging purchases to one source.

- Five strategically located manufacturing plants across the United States
- Broad base of converting capabilities
- Industry leading graphics capabilities
- Innovative specialty packaging solutions
- Wide variety of stock products

Headquartered in Chicago, IL, our national manufacturing and distribution platform includes:

- 5 plants with a total of 820 employees
- 125 production lines
- Unique ability to produce products at multiple locations

Custom Cut

Baking pan liners save operators money by eliminating the labor time and cleaning costs associated with greasing and washing baking pans.

When it comes to labor and cost-saving product innovation, BagcraftPapercon is a baker's best friend. We manufacture the most complete line of quality baking pan liners in the industry for multiple applications, such as baking, food wrapping, interleaving or microwave use.

If your foodservice operation requires custom cut sheets or rolls, we have the converting capabilities to meet your specific needs. For more information about our custom printing and converting capabilities, find your local representative at www.bagcraft.com/rep.html.

Sandwich Wraps & Basket Liners

We offer the broadest, most diverse product line available to help clients meet a wide range of packaging needs in the quick-service, fast-casual, family dining, concession and institutional markets.

With our state-of-the-art graphic and converting capabilities, you're assured our wraps and liners perform as beautifully as they look.

From wraps printed randomly in one to four colors to photographic process graphics and everything in between, we can achieve the form, function and style you want.

Our manufacturing locations are strategically spread across the entire country to deliver timely service, reduced costs and efficient logistics.

Sandwich Wraps & Basket Liner Materials

Tissue: An untreated, lightweight tissue sheet with wet strength used for wrapping hot dogs, cones and foods with low moisture or grease content. Improve the “ease of eating” qualities of burgers by wrapping half the burger in our tissue wrap, then wrap the whole burger in a grease resistant, poly-wax, I-Rap®, insulated paper or foil insulated wrap for superior functionality and food presentation.

Dry Wax Paper: Wax is driven into the paper fibers to produce a material that improves wet strength and moisture resistance. Dry wax wraps have wet strength and provide moderate moisture and grease resistance. Our dry wax material is an affordable option for basic dry food wrapping applications.

Grease Resistant Paper: A grease resistant coating is applied to this paper to decrease grease penetration and staining. Grease resistant paper creates a whiter, more opaque printing surface for custom logos or designs compared to dry wax. The paper is breathable, which keeps wrapped breads fresher and less soggy by letting steam and moisture escape. This material offers an affordable and functional solution for a variety of food-wrap and basket-liner applications.

Poly-Wax Paper: This paper is coated on one side with a poly-wax blend. Poly-wax paper resists moisture, grease and staining over longer holding times making it a favorite wrap among national quick-service restaurant chains. Poly-wax paper is the best value choice for lining all types of food baskets. Poly-wax sandwich wrap is commonly referred to as a coated one side wrap. Printed basket liners contain a poly-wax coating applied over the paper and ink, which keeps printed logos and designs protected from moisture, grease and direct contact with food... commonly referred to as a coated over copy basket liner.

I-Rap™: A two-layer insulated paper wrap that combines a layer of grease resistant paper and a layer of absorbent paper bonded together with a honeycomb adhesive design to create air pockets, which provide improved insulation, heat retention and holding times. I-Rap™ provides heat retention for hot food applications without a wax, foil or poly barrier. The two-ply paper wrap is biodegradable and commercially compostable. Our I-Rap™ insulated paper allows moisture and steam to escape naturally, which keeps breads from getting soggy.

Clear Polypropylene: A clear plastic sheet with superior barrier properties for displaying cold sandwiches and other chilled deli-case foods. The material extends the shelf life of displayed food with an oxygen and moisture barrier. Our clear polypro wraps improve the visibility, upscale image and impulse sales of products when displayed.

Insulated Paper: A three-ply material, consisting of a very thin layer of poly sandwiched between two layers of paper, with excellent heat retention, grease resistant and moisture-absorption properties. It offers a superb alternative to paperboard clamshells in heat retention for holding times and in solid-waste reduction. The material is safe for the microwave providing a practical, re-heatable substitute for foil insulated wraps. This multi-purpose wrap combines superior performance with a professional-grade look and feel to reinforce a quality image with customers.

Foil Insulated Paper: A two-layer insulated wrap made of foil and paper laminated together to form a superior material for a wide variety of foodservice applications. We laminate the foil and paper together with a honeycomb-shaped adhesive design. This design creates insulating air pockets between the layers, which improve heat retention and increase holding times. Honeycomb foil insulated wraps provide the best overall heat retention, moisture/grease resistance, holding times, dead-fold and product appearance. BacraftPapercon was the first company to manufacture this foil insulated wrap with the honeycomb design, and we continue to be the industry leader in flexible sandwich packaging innovation.

Foodservice Bags

BagcraftPapercon has serviced the specialty bag needs of the foodservice industry since 1947. From specialty bags printed randomly in one to four colors to photographic process graphics and everything in between, we can achieve the form, function and style you want with a wide variety of flexible materials.

We designed our EcoCraft® line to reduce the raw material waste and improve overall sustainability while keeping the packaging affordable. Purchasing EcoCraft® foodservice bags is an easy way for your company or operation to take a simple step toward a sustainable future.

For more information about our custom printing and converting capabilities, find your local representative at www.bagcraft.com/rep.html.

Carryout Bags & Food Trays

BagcraftPapercon offers the most complete line of ToGo! and carryout bags in the industry. We helped popularize the original "Doggie" carryout bag many decades ago, and we continue to be the leader in flexible carryout packaging innovation. Plastic packaging can make fried foods soggy due to excess moisture retention. Our ToGo! bags are made from grease and moisture resistant heavyweight paper, which provides superior stain resistance. Our breathable ToGo! bags are vented to release excess steam and moisture so fried foods stay fresh and crispy during transport. Your foodservice operation can save costs and improve your sustainability by replacing rigid plastic or paperboard carryout containers with flexible "right size" bags offering higher count case packs and smaller case cubes. For more information about our custom printing and converting capabilities, find your local representative at www.bagcraft.com/rep.html.

Why EcoCraft® Products?

Foodservice packaging made from unbleached natural paper is more than just a sustainable look or marketing trend. Unbleached natural paper was chosen for the EcoCraft® line due to its real impact in reducing raw material waste. The chart below presents an overview of the significant waste reduction advantages in producing unbleached natural paper.

	Bleached Food Paper	Unbleached Food Paper	Reduction %
Quantity	1,000 tons	1,000 tons	
Wood Use	3,080 tons	2,450 tons	20.5%
Wastewater	19,749,050 gallons	10,279,750 gallons	48%
Solid Waste	2,282,610 pounds	1,918,140 pounds	16%

Natural Advantages of EcoCraft® Products

- Made with FDA food-grade, 100% unbleached, chlorine-free paper
- Packed in 100% recycled paperboard inner-carton and tray dispenser packaging to reduce raw-material waste
- Soy-blended dry wax on interfolded sheets reduce reliance on petroleum wax
- New dispenser carton and tray design includes printed facts and information about the sustainability benefits of EcoCraft®
- Multiple EcoCraft® products and third-party certified compostable
- Reduces your carbon footprint by purchasing form-fitting, "right size," flexible packaging with high case counts and small case-cube size
- An experienced national network of sales representatives that can help advise your business on ways to improve your sustainable packaging design

We believe in the "Triple Bottom Line" approach of continuous improvement in sustainable packaging design.

- Social Responsibility – good for the people
- Ecological Responsibility – good for the planet
- Economic Responsibility – affordable choices

As members of the Sustainable Packaging Coalition, we support a common vision of attaining a true closed-loop system for all packaging that promotes positive environmental and economic outcomes. Part of this vision is ensuring that our sustainable packaging is affordable today in order to make a more significant and lasting impact on the environment for the future.

With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products. **This commitment to affordability and innovation has allowed BagcraftPapercon to create the most recognized brand of sustainable flexible packaging available in the industry.**

Purchasing EcoCraft® is an easy way to take a simple step toward a sustainable future

Custom Converting & Printing Capabilities

BagcraftPapercon offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 125 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet, or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, poly or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

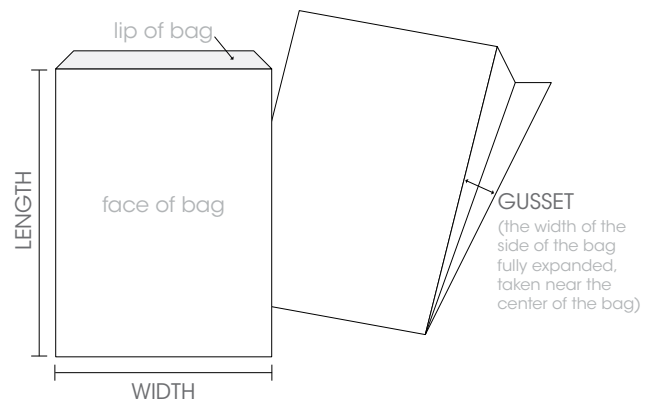

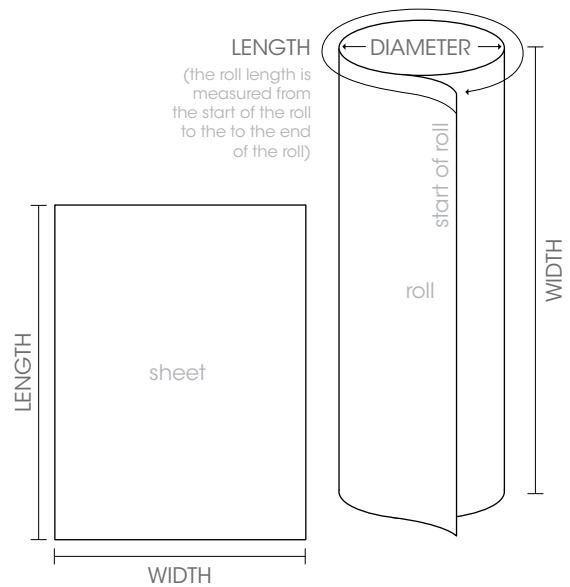

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

If you have a specific question about our custom or graphics capabilities, please call 800-621-8468, ext. 8012.
