Innovative

Ever since BagcraftPapercon first introduced our flexible foodservice packaging in 1947, we have been committed to developing innovative solutions that successfully address the ever-evolving needs and expectations of foodservice, supermarket and food processing companies worldwide. Such innovation has generated 17 patents and scores of national and international packaging awards for our company and positioned us as the largest paper-based, flexible foodservice packaging firm in North America. Most importantly, our innovative solutions have helped our clients greatly improve their foodservice operations, product performance and bottom lines.

Practical

BagcraftPapercon places a keen focus on value and function in the design and manufacturing of our products. Flexible foodservice packaging offers a practical blend of affordability and functionality, which makes it an excellent choice to reduce costs while improving bottom line growth. With more consumers and operators demanding practical packaging alternatives to rigid plastic and paperboard, our flexible paper packaging offers the most practical, cost-effective option available because it produces less waste, requires fewer raw materials and reduces manufacturing, transportation and storage costs.

Sustainable

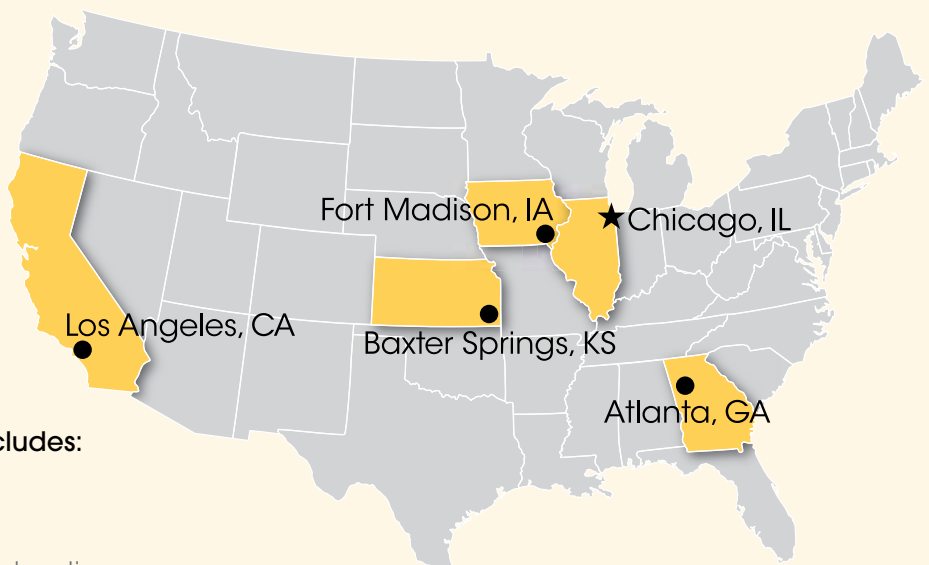

BagcraftPapercon has also been at the forefront in bringing sustainable packaging choices to the industry. With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products through eco-centered technologies, innovations and solutions that meet our sustainability goals and those of our clients. As members of the Sustainable Packaging Coalition, we support a common vision of attaining a true closed-loop system for all packaging that promotes positive economic and environmental outcomes. Part of this vision is ensuring that our sustainable packaging is affordable today in order to make a more significant and lasting impact on the environment for the future.

We make it easy for you to consolidate your flexible foodservice packaging purchases to one source.

- Five strategically located manufacturing plants across the United States
- Broad base of converting capabilities
- Industry leading graphics capabilities
- Innovative specialty packaging solutions
- Wide variety of stock products

Headquartered in Chicago, IL, our national manufacturing and distribution platform includes:

- 5 plants with a total of 867 employees
- 130 production lines
- Unique ability to produce products at multiple locations

Natural Advantages of EcoCraft®

- Made with FDA food-grade, 100% unbleached, chlorine-free paper
- Packed in 100% recycled paperboard inner-carton and tray dispenser packaging to reduce raw-material waste
- Soy-blended dry wax on interfolded sheets reduce reliance on petroleum wax
- New dispenser carton and tray design includes printed facts and information about the sustainability benefits of EcoCraft®
- EcoCraft® products, on average, contain 20% pre-consumer waste fiber
- Multiple EcoCraft® products are third-party certified compostable
- Reduces your carbon footprint by purchasing form-fitting, “right size,” flexible packaging with high case counts and small case-cube size
- An experienced national network of sales representatives that can help advise your business on ways to improve your sustainable packaging design

We believe in the “Triple Bottom Line” approach of continuous improvement in sustainable packaging design:

Social Responsibility – good for the people

Ecological Responsibility – good for the planet

Economic Responsibility – affordable choices

With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products. **This commitment to affordability and innovation has allowed BagcraftPapercon to create the most recognized brand of sustainable flexible packaging available in the industry.**

Innovation:

Rigid Plastic

vs.

Flexible Paper

Juice and moisture collected from the bottom of a food tray in our breathable ToGo! Hot Meal package after 4 hours in a heated merchandising case

Rigid Plastic Deli Packaging

- Hot Sauna Effect
- Fogged Visibility
- Large Case Cube
- Made From Oil

- Fogged visibility through plastic dome and blocked visibility from sleeves may reduce product-quality inspection, which can reduce impulse sales
- Sauna effect can produce condensation and juice release while the product is merchandised in the heated display case, which results in hot juice and moisture pooling at the bottom of the plastic base tray
- Takes up extra space in refrigerator when storing leftovers and in kitchen wastebasket when disposed
- Plastic dome lid and base tray must be sealed correctly to avoid messy spills at checkout, in transit and at home
- Requires carry sleeves or handles for safer portability
- If chickens are put directly into the rigid package and not allowed to rest after roasting, they can continue to cook, which may make the product dryer and less flavorful
- Rigid plastic containers are packaged in high cube shipping cases with low case packs, which means they require extra space in storage and in transit.

ToGo! Hot Meal Deli Packaging

- Lower Packaging Costs
- Superior Visibility
- Drive Impulse Sales
- Improve Sustainability

- Breathable paper packaging improves the flavor and juice retention of the food
- Grab-and-go package design eliminates the extra cost of paperboard sleeves
- Anti-fog film window drives impulse sales with superior high-definition visibility
- High-tech grease and moisture resistant paper provides superior stain protection
- Balanced ventilation design allows moisture release and heat retention
- Fried foods stay crispy and appetizing in transport from the store to the dinner table
- Maintains safe food temperatures at the required hot case shelf temperatures
- Provides a large surface area to print your logo or brand design. We can print one to four color line art and photographic process print
- Rotisserie chicken applications require a food tray be placed at the bottom of the package for support

ToGo! Hot Meal Packaging

EcoCraft® ToGo! Hot Meal Window Packaging

- Clear anti-fog windows maximize visibility and impulse sales
- Significantly more sustainable than rigid plastic containers
- Innovative ventilation system keeps food flavorful and crispy
- Grease resistant, high barrier paper provides stain protection

Sandwich Wrap & Bag Materials

Dry Wax Paper: Wax is driven into the paper fibers to produce a material that improves wet strength and moisture resistance. The paper provides good moisture resistance and moderate grease resistance. Our dry wax material is an affordable option for basic deli food wrap or bag applications.

Grease Resistant Paper: A grease resistant coating is applied to this paper to decrease grease penetration and staining. The paper creates a whiter, more opaque printing surface for custom logos or designs compared to dry wax. The paper is very breathable, which keeps wrapped or bagged sandwiches fresher and less soggy by letting steam and moisture escape. This material offers an affordable and functional solution for a variety of food-wrap and single serve bag applications.

Barrier Wax Paper: This paper is coated on one side with a barrier wax blend. The material resists moisture and grease and extends holding times making it a favorite wrap among national quick service restaurant chains. Barrier wax sandwich wrap is commonly referred to as a coated one side (COS) wrap.

I-Rap™: A two-layer insulated paper wrap that combines a layer of grease resistant paper and a layer of absorbent paper bonded together with a honeycomb adhesive design to create air pockets, which provide improved insulation, heat retention and longer holding times. I-Rap™ provides heat retention for hot food applications without a wax, foil or poly barrier. The two-ply paper wrap is biodegradable and commercially compostable. Our I-Rap™ insulated paper allows moisture and steam to escape naturally, which keeps breads from getting soggy.

Dubl Shield™: Our innovative insulated Dubl-Shield™ wrap has a highly functional grease and moisture barrier, but will allow moisture to escape, which keeps your bread or bun from getting soggy and losing freshness. The wrap has superior graphic printability on the flat grease resistant outer layer. Improved sustainable design offers an alternative to foil and poly insulated wraps and it's certified compostable by Cedar Grove, which gives it a clear end of life advantage. Dubl-Shield™ can be printed on the grease resistant layer with one to four colors and can be produced with tinted adhesive to showcase a message or graphics on the inside of the wrap. Our proprietary triangle design air pockets help keep food hot during the average 7 minute holding time before consumption.

Clear Polypropylene: A clear plastic sheet with superior barrier properties for displaying cold sandwiches and other chilled foods in the deli merchandising case. The material extends the shelf life of displayed food with an oxygen and moisture barrier. Our clear polypro wraps improve the visibility, upscale image and impulse sales of your deli products.

Insulated Paper: A three-ply material, consisting of a very thin layer of poly sandwiched between two layers of paper, with excellent heat retention, grease resistance and moisture-absorption properties. It offers a superb alternative to paperboard clamshells in heat retention for holding times and in solid waste reduction. The material is safe for the microwave providing a practical, re-heatable substitute for foil insulated wraps. This multi-purpose wrap combines superior performance with a professional-grade look and feel to reinforce a quality image with customers.

Foil Insulated Paper: Made of foil and paper laminated together to form a multi-functional material for a wide variety of foodservice applications. We laminate the two layers together with a honeycomb-shaped adhesive design. This design creates insulating air pockets between the layers, which improve heat retention and increase holding times. Honeycomb foil insulated wraps and bags provide the best overall heat retention, moisture/grease resistance, holding times, dead-fold and product appearance. BagcraftPapercon was the first company to manufacture this foil insulated wrap with the honeycomb design, and we continue to be the industry leader in flexible sandwich packaging innovation.

Bakery Packaging

We offer the broadest, most diverse product line available to help clients meet a wide range of bakery packaging needs

With our state-of-the-art graphic and converting capabilities, you're assured our bakery packages perform as beautifully as they look. From bags printed randomly in one to four colors to photographic process graphics and everything in between, we can achieve the form, function and style you want.

Our manufacturing locations are strategically spread across the entire country to deliver timely service, reduced costs and efficient logistics.

Innovation:

Rigid Plastic

vs.

Flexible Paper

In a sea of rigid plastic packaging, its time to...

...bring some differentiation to your bakery department

- Lock in freshness and extend shelf life with our duplex construction
- Small footprint enables larger inventories to be stacked horizontally on top shelf
- Drive impulse sales with our large window that draws customer eye contact to your product
- Improve your brand's image with a custom process print or line art logo or design
- Extend product freshness at home with our re-closable tin tie

Stand Up Window Duplex Bag

Stand Up Duplex Bakery Packaging

Window Stand Up Bakery Bags

- Lock in freshness with our paper/poly duplex construction
- Easy to seal and reseal with tin tie closure system
- Heat sealable for shelf-life extension

Bakery Pan Liners

Baking pan liners save operators money by eliminating the labor time and cleaning costs associated with greasing and washing baking pans.

When it comes to labor and cost-saving product innovation, BagcraftPapercon is a baker's best friend. We manufacture the most complete line of quality baking pan liners in the industry for multiple applications, such as baking, food wrapping, interleaving or microwave use.

If your foodservice operation requires custom cut sheets or rolls, we have the converting capabilities to meet your specific needs. For more information about our custom printing and converting capabilities, find your local representative at www.bagcraft.com/rep

Custom Converting & Printing Capabilities

BagcraftPapercon offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 125 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet, or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, poly or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

If you have a specific question about our custom or graphics capabilities, please call 800-621-8468, ext. 8012.
